

AC745 *Porphyridium* sp.

| Taxonomy | | Image | Origin | | |
|---------------------------------|------------------------|--|----------------------|---------------------------|--------------|
| Kingdom | Plantae |  | Climatic Zone | - | |
| Division | Rhodophyta | | Habitat | - | |
| Class | Porphyridiophyceae | | Ocean | - | |
| Order | Porphyridiales | | Sea | - | |
| Family | <i>Porphyridiaceae</i> | | Country | - | |
| Genus | <i>Porphyridium</i> | | Region | - | |
| Species | sp. | | Geolocation | - | |
| Authority(ies) | - | | Latitude | - | |
| | | Longitude | - | | |
| Identity | | Morphology | Culture | | |
| Holotype | No | Length (µm) | - | Isolated by | Sinan & Arad |
| Equivalent code | - | Width (µm) | - | Isolation date | - |
| Deposited by | - | Diameter | - | Isolation site | - |
| Deposit date | 11 septembre 2008 | Wall | - | Culture medium | K/2 |
| Identified by | - | Comments | - | Growth temperature | 19 °C |
| | | | | Growth light | 100 µE |
| | | | | Toxicity | Unproven |
